1 • Brand overview

Name	Orbit Studio (est. 2024), Surat, India
Positioning	AI-powered studio shipping editorial websites in 48 hours, marketing automation that runs itself, and performance marketing that compounds.
Tagline	Build. Automate. Scale.
Disciplines	Build (websites in 48h) • Automate (lifecycle, CRM, AI workflows) • Scale (paid, SEO, analytics)
Proof points	48h average launch • 120+ sites shipped • 3.4× avg ROAS lift • 96% client retention
Voice	Operator-led, plainspoken, confident. "Operators who don't do agency theatre." Editorial craft with growth-team rigour.
Look	Warm ivory paper, deep navy ink, single gold accent; orbit motif (ring, arc, node); generous whitespace; editorial italic accent words.
Contact	support@orbitstudio.co.in • +91 90541 70113 • 202, Eco Commerz, GD Goenka Canal Road, Vesu, Surat 395007

SECTION 2

Logo system

The mark is a navy ring broken by a gold orbital arc ending in a node: a studio at the centre, work launched into orbit. Rebuilt as clean vector with the wordmark outlined in Satoshi Medium and the brand navy #092D3F.

Primary lockup — orbit-logo-primary.svg

Reversed — orbit-logo-reversed.svg

Nav lockup (no tagline) — orbit-logo-nav.svg

Nav reversed — orbit-logo-nav-reversed.svg

Mono navy — orbit-logo-mono-navy.svg

Mono white — orbit-logo-mono-white.svg

Mark — orbit-mark.svg

Mark reversed — orbit-mark-reversed.svg

Logo rules, icons & favicon

Do

Use the primary lockup on hero/cover/print. Use the nav lockup (no tagline) in headers under 48px. Keep clear space equal to the node diameter. Minimum size: 24px mark, 96px nav lockup, 160px primary lockup. Use reversed on navy, mono for single-colour print.

Don't

Don't use the raster PNG from the old site. Don't set the wordmark in another typeface. Don't recolour the arc (gold only, or the same colour as the ring in mono). Don't place gold-on-ivory text smaller than 24px. Don't add shadows, outlines or gradients.

Icons

favicon.svg

app-icon-ivory.svg

512

192

180 / apple-touch

32

The favicon uses a heavier mark (ring 18, arc 10.5, node 13 on a 120 grid) on navy so it stays readable at 16—32px.

Recommended head tags:

```
<link rel="icon" href="/favicon.svg" type="image/svg+xml">
<link rel="icon" href="/favicon-32.png" sizes="32x32">
<link rel="apple-touch-icon" href="/apple-touch-icon.png">
<meta name="theme-color" content="#F6F2EA">
```

Colour palette

Muted Text
#3F5969
Body secondary (6.6:1)

Contrast (WCAG)

Pair	Ratio	Verdict
Navy #092D3F on Ivory #F6F2EA	12.9:1	AAA, all text
Muted #3F5969 on Ivory	6.6:1	AA, body text
Gold Text #8A5A14 on Ivory	5.3:1	AA, small text, eyebrows, links
Gold Dark #B77F31 on Ivory	3.1:1	Large text (≥24px) only
Gold #D2A14F on Navy #092D3F	6.1:1	AA, text on navy
Gold #D2A14F on Ivory (old usage)	2.1:1	Fails. Do not use for text.

Gold has three jobs. Decoration (fills, dots, rules, orb), text on navy, and — in its darker #8A5A14 form — text on light backgrounds. Proportion guide: Ivory 60 • Navy 28 • Gold 8 • Neutrals 4.

Typography

Display — Satoshi Bold

H1 • clamp(2.5rem, 5.2vw, 4.5rem) • line-height 1.04 • tracking -0.03em

Heading 2 — Satoshi Bold

H2 • clamp(2rem, 3.6vw, 3.25rem) • 1.08 • -0.025em

Heading 3 / card title — Satoshi Medium

H3 • 1.5rem • 500

Body copy in Satoshi Regular. An AI-powered studio shipping editorial websites in 48 hours, marketing that runs itself, and growth loops engineered to compound.

Body • 1rem • 400 • colour #3F5969 on ivory

scale, agency theatre, worth scaling.

Accent • Instrument Serif Italic • 1.08em • colour #8A5A14 (on navy: #D2A14F). Also used for quote marks.

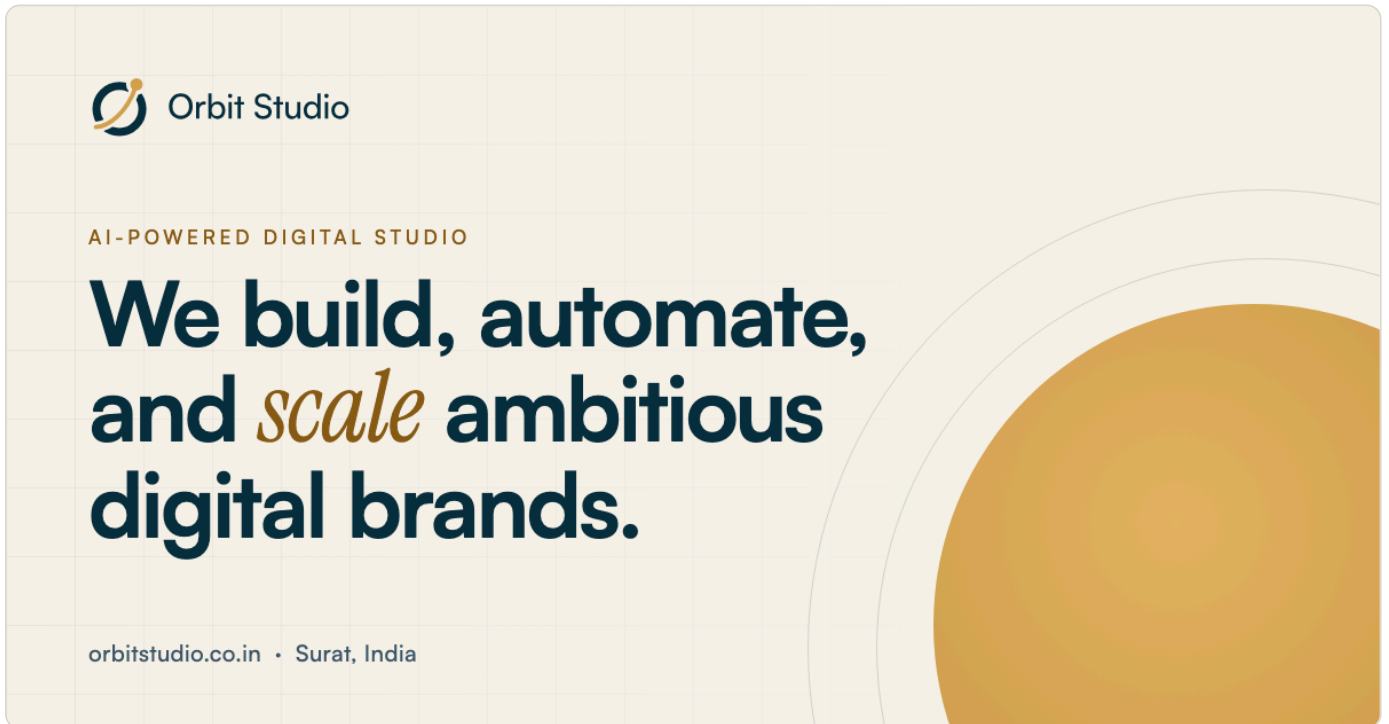

ORBIT STUDIO • EST. 2024

Eyebrow • 0.75rem • 500 • uppercase • +0.18em • #8A5A14

Rules

Weights	Satoshi 400, 500, 700 only. Satoshi on Fontshare has no 600 or 800 and no italic; do not request them.
Accent	One italic accent phrase per heading, max. Instrument Serif regular style is italic only.
Sizes	No text below 12px. Stat labels 12px/500/+0.12em uppercase.
Loading	Satoshi 400/500/700 + Instrument Serif italic, font-display: swap. Four files total.
Fallbacks	ui-sans-serif, system-ui • Georgia for the accent.

Social card (Open Graph)

1200 × 630 PNG replaces the stale Lovable preview image. Add: `og:image` (absolute URL), `og:image:width=1200`, `og:image:height=630`, `og:url`, `twitter:card=summary_large_image`, `twitter:image`.

Audit findings & fixes

Audited 4 Oct 2026, desktop + 375px mobile. Note: orbitstudio.in is only a Hostinger parked page; point it (301) to orbitstudio.co.in.

Findings

Assets

#	Issue	Evidence	Fix (in this kit)
A1	Logo is a 1660×417 raster PNG with noisy anti-aliasing (thousands of near-identical navy shades)	orbit-logo.png, rendered at 175×44	Clean vector set: logo/*.svg + PNG
A2	Logo wordmark is a different typeface (geometric, Poppins-like) from the site's Satoshi	nav vs. headline	Wordmark re-set in Satoshi Medium, outlined
A3	Logo navy #273748 ≠ site navy #092D3F	pixel sample	Logo uses #092D3F
A4	Logo tagline ≈ 8px at nav size — illegible; its gold "SCALE." is 2.3:1	44px-high logo	Nav lockup has no tagline; tagline only in primary lockup, gold-text #8A5A14
A5	Three different logo treatments: nav raster lockup, footer plain text "Orbit.Studio", OG card "Orbit.Studio" (bold, system font)	nav / footer / og	One lockup system (primary, nav, reversed, mono, mark)
A6	Favicon is a 64×64 raster of the full mark — mush at 16/32px; no apple-touch-icon, no SVG favicon, no theme-color	/favicon.png	icons/favicon.svg, 32/180/192/512 PNG, bolder simplified mark on navy
A7	OG image is a stale Lovable preview (...lovable.app...png on an r2.dev host), rendered in fallback system font, old wordmark, cropped hero. No twitter:card.	og: image meta	social/og-image.png 1200×630 — on brand
A8	Hero orbit icons (Slack, Figma, Gemini, Python, React, Claude, Make, Supabase) are multicolour third-party logos hot-linked from images.shadcn.space.com (incl. a file called c_lude.svg) — clash with the 3-colour palette, depend on an external host, and imply partnerships	17 tags	Self-host and recolour as single-colour navy/gold glyphs at 60% opacity (or replace with your own service icons)

Colour

#	Issue	Fix
C1	Gold #D2A14F on ivory is 2.1:1 — fails WCAG even for large text. Used for the hero word "scale", eyebrows, "STEP Ox", "LEARN MORE" and footer links	Split gold into roles: --gold (fills/dots + text on navy only, 6.1:1), --gold-dark #B77F31 (large text only, 3.1:1), new --gold-text #8A5A14 (small text, 5.3:1)
C2	Body/label text uses alpha tints (0.65—0.8 opacity navy) over textured backgrounds; stat labels ("AVERAGE LAUNCH TIME") are 11px at ~0.6 alpha	Solid --muted-foreground #3F5969 (6.6:1), min 12px
C3	Hero orb has a grey/black halo (blur of the navy dots over gold) — reads as a smudge, off-palette	Remove dark blur; use gold radial gradient + dot texture only
C4	Orb overlaps the "96% Client retention" stat and its label	Move the orb behind / clip it to the right column, z-index: -1

#	Issue	Fix
C5	--destructive #D40C1A is the only off-palette hue and is unused in the UI	Warmed to #B3261E

Typography

#	Issue	Fix
T1	Satoshi has no 600 weight. Fontshare serves 300/400/500/700/900; the site uses font- semibold (600) everywhere ($\approx$ 50 headline nodes) so browsers fall to 700 inconsistently	Standardise on 400 / 500 / 700 and load only those
T2	Italic accents ("scale", "agency theatre.", "worth scaling.") are faux-italic — no italic file is loaded	Use Instrument Serif Italic for accent words (real italic; reinforces "editorial")
T3	Testimonial quote marks fall back to ui- serif (system-dependent: Times / New York / Georgia)	Same Instrument Serif
T4	Loads 7 weights ($\approx$ 300—900) of which 3 are used	Load 400, 500, 700 + one serif italic; font- display:swap
T5	Heading scroll-reveal leaves headings pale grey mid-scroll ("Three disciplines." etc.) — poor contrast whenever the user pauses	Reveal starting colour no lighter than #5B7383 (4.5:1) or fade opacity only

Layout / display

#	Issue	Fix
L1	Large empty band ($\sim$ 150—250px) after the Work carousel before the next section	Trim section padding to the 96/128px rhythm
L2	Work-strip cards are cropped screenshots of client sites with inconsistent aspect ratios; collapsed cards show only a rotated name and unreadable crops	Use consistent 4:5 hero crops, same corner radius, caption always visible
L3	Testimonials are generic (Lumen, Aurelia, Northwind — all Western SaaS) while the portfolio is Indian D2C apparel/jewelry	Replace with real client quotes or remove — highest trust risk on the page
L4	Mobile hero: headline sits under the orb/icon cluster; icons float over the empty hero	Stack: headline → CTA → orb below, icons hidden < 640px

Scope note

The site is built in Lovable, so I cannot edit its code from here. Everything above is delivered as assets + tokens + a paste-ready prompt (LOVABLE-PROMPT.md).

Design tokens (brand-tokens.css)

```

/* Orbit Studio – brand tokens. Drop into :root / Tailwind theme. */
:root{
  /* Core */
  --ivory:#F6F2EA; --warm-white:#FCFAF6; --cream:#EDE6DA; --warm-gray:#DBD5C9;
  --navy-deep:#092D3F; --navy-medium:#1A445A; --navy-light:#2E6681;
  /* Gold: THREE roles – never use --gold for small text on light backgrounds */
  --gold:#D2A14F; /* decorative fills, dots, rules; text only on navy (6.1:1) */
  --gold-light:#E3B461; /* gradients / hover on navy */
  --gold-dark:#B77F31; /* large display text only (3.1:1 on ivory) */
  --gold-text:#8A5A14; /* eyebrows, labels, links on light (5.3:1 on ivory) */
  --muted-foreground:#3F5969; /* 6.6:1 on ivory */
  --border:#DDD7CB; --destructive:#B3261E;
  /* Type */
  --font-sans:"Satoshi",ui-sans-serif,system-ui,sans-serif; /* 400 / 500 / 700 ONLY */
  --font-accent:"Instrument Serif",Georgia,serif; /* italic accent words + quote marks */
  --fw-regular:400; --fw-medium:500; --fw-bold:700;
  --text-display:clamp(2.5rem,5.2vw,4.5rem); /* H1 / lh 1.04 / -0.03em */
  --text-h2:clamp(2rem,3.6vw,3.25rem); /* H2 / lh 1.08 / -0.025em */
  --text-h3:1.5rem; --text-body:1rem; --text-small:.875rem;
  --text-eyebrow:.75rem; /* uppercase, +0.18em, 500 */
  --radius:.5rem; --radius-pill:999px;
}
.accent{font-family:var(--font-accent);font-style:italic;font-weight:400;color:var(--gold-text);letter-spacing:-.01em}
.on-navy .accent{color:var(--gold)}
.eyebrow{font-size:var(--text-eyebrow);font-weight:500;letter-spacing:.18em;text-transform:uppercase;color:var(--gold-text)}
h1,h2,h3{font-family:var(--font-sans);font-weight:var(--fw-bold)}

```

Lovable implementation prompt

Upload the kit files to the project, then paste:

Apply a brand refresh to this site. Keep layout, copy and animations; change only the following.

ASSETS (I will upload these files: orbit-logo-nav.svg, orbit-logo-nav-reversed.svg, orbit-logo-primary.svg, orbit-mark.svg, favicon.svg, favicon-32/180/192/512.png, og-image.png)

1. Replace the header logo PNG with orbit-logo-nav.svg (height 36px desktop / 32px mobile, no tagline). Replace the plain-text "Orbit.Studio" in the footer with orbit-logo-nav-reversed.svg.
2. Favicon: `- 3. Replace og:image with /og-image.png (absolute URL on the live domain), add og:image:width 1200 / height 630, og:url, `twitter:card=summary_large_image`, twitter:image.
- 4. Self-host the hero orbit icons (no hotlinking to images.shadcn.space.com). Render each as a single-colour glyph (navy #092D3F at 60% opacity). Hide the icon orbit below 640px.

COLOUR TOKENS (replace in index.css / tailwind config)

- Add --gold-text: #8A5A14. Use it for every small gold text on light backgrounds (eyebrows, STEP 0x, LEARN MORE, link hovers, "ORBIT STUDIO · EST. 2024").
- Large gold display words on light backgrounds ("scale" in H1, "worth scaling."): #8A5A14 as well (or #B77F31 at ≥48px). On navy sections keep #D2A14F.
- Keep --gold #D2A14F only for dots, rules, buttons on navy, the orb.
- Replace alpha text colours (text-navy-deep/65 etc.) with solid #3F5969. Minimum text size 12px.
- --destructive: #B3261E.

TYPOGRAPHY

- Load only Satoshi 400, 500, 700 (Fontshare). Remove 300/600/800/900 and replace every font-semibold with font-bold (700) - Satoshi has no 600.
- Load Instrument Serif (regular + italic) from Google Fonts. Use it ONLY for accent words ("scale", "agency theatre.", "worth scaling.") as `font-style: italic; font-weight: 400` at 1.08em, and for the testimonial quote marks. Remove the faux italic.
- Headings: H1 clamp(2.5rem, 5.2vw, 4.5rem) lh 1.04 tracking -0.03em; H2 clamp(2rem, 3.6vw, 3.25rem) lh 1.08.
- Scroll-reveal headings: start colour no lighter than #5B7383.

HERO / LAYOUT

- Remove the dark/grey blur halo around the gold orb; use a radial gradient (#E3B461 → #D2A14F → #B77F31) + the dot texture.
- Orb must not overlap the stat row: place it behind (z-index -1), clipped to the right column; stats stay fully legible.
- Reduce the empty gap below the Work carousel (section padding py-24 / lg:py-32).
- Mobile (<640px): stack headline → paragraph → CTAs → orb below.
- Redirect orbitstudio.in → https://orbitstudio.co.in (301).
